Claims 141-146, 148, 150-168, 170-175, 179 and 181-204 are presented for examination.

The response to the restriction requirement of May 17, 2007 has been received and entered. Applicant elected reconstituted high-density lipoprotein as primary agent, extracellular matrix component as a secondary component and the treatment of corneal damage following photo-refractive keratectomy as a disorder.

The claims will be examined to the extent that they read on the elected subject matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 141-146, 148, 150-168, 170-175, 179 and 181-204 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims are drawn to a reconstituted high-density lipoprotein. The instant specification describes a few compounds as high-density lipoprotein. In the absence of understanding the compounds covered by the phrase "a reconstituted high-density lipoprotein", the artisan does not accept that applicant was in possession of the claimed invention.
